

ITV Environmental Management Policy

Climate Action is integral to ITV’s Social Purpose strategy of shaping culture for good. We want to make shows with the biggest impact on audiences and the smallest impact on the planet. ITV’s Climate Action targets were set in 2020, alongside a robust governance structure to deliver them.

Climate Action is a very fast evolving area. We regularly review our approach to keep up with growing regulatory requirements and stakeholder expectations.

ITV’s Climate Action Targets

NET ZERO

- Reduce carbon emissions we control (Scope 1 & 2) by 46.2%, and emissions we influence (Scope 3) by 28% by 2030, and reduce all emissions by 90% by 2050, against our baseline year of 2019. These targets have been validated by the Science-Based Targets initiative.

SUPPLY CHAIN

- 100% sustainable supply chain by 2030 through supporting suppliers to improve their environmental impact.

CIRCULAR ECONOMY

- By 2030, over 90% of our waste will be reused or recycled.

CULTURE

- All ITV colleagues to complete climate action training every year.
- 100% of the shows we produce and commission in the UK to receive BAFTA albert certification.
- Engage audiences by delivering on our Climate Content Pledge.

Further information can be found in our [Climate Transition Plan](#) which details how we will transform ITV to meet our ambitious targets. For more information on our climate action progress, please see our latest [Impact Report](#).
